RODMAN PRESENTS AT CANNES TWO NEW MODELS OF ITS MUSE RANGE

The Rodman MUSE 74 will represent Rodman in the "World Yacht Trophies 2008" after the success of the Rodman MUSE 54 in 3 of 4 categories in last year's event.

Vigo, 8th September 2008. Rodman arrives this year to the "Festival International de La Plaisance", in Cannes, with the presence of the three actual representatives of the prize winning Rodman MUSE range: the 44, 54 and 74. The smallest and the biggest models of the range will be exhibited for the first time in Cannes.

The Rodman MUSE 54, which production for 2007 was sold out immediately, was widely recognized in events like the "Motor Boat of the Year 2008" or the "World Yacht Trophies 2007".

The whole Rodman MUSE range has reached high prestige and a thrilling sales success. It has become well-known in a short time since it won the special prize of the Jury at the last "World Yacht Trophies", in Cannes, for the best development project for a new range in the international nautical sports industry.

The three cruisers have recently been presented and tested by the international press, which received them with great enthusiasm, as can be seen in the extensive documentation available on the official website: www.rodmanmuse.es.

The fourth project in the Rodman MUSE range, that will have a length of 49 feet, is in the construction phase in the shipyard, and will be launched during the first half of 2009. It will be joined by other models of different lengths, including one over 100 feet.

Rodman will also present the draft project for its Rodman MUSE 104 model, which is the largest in this range. It's a custom made yacht, designed as the others in the range by Fulvio De Simoni.
