

***International consortium Timmerman Yachts will participate in world exhibitions
Cannes Boat Show 2008 and Monaco Yacht Show 2008***

On 10-15th of September 2008 international consortium Timmerman Yachts for the first time will participate in world exhibition Cannes Boat Show (Vieux Port & Port Pierre Canto), on 24-27th of September 2008 in exclusive exhibition Monaco Yacht Show (Port Hercules). In Cannes Timmerman Yachts will present new sea super yacht of Timmerman 33 project, designed by Dutch company Ginton Naval Architects и Guido de Groot Design. Light ice class of the yacht enables the owner to use it in any season and due to warmth saving windows and modern climate-control system Heinen&Hopman the guests will feel comfortable at any overboard temperature from –20 to +45 °C. Three deck vessel with steel hull and aluminum superstructure was built under the supervision of Det Norske Veritas (DNV) and completely complies with MCA requirements.

Timmerman 33 provides for excellent sea-going characteristics as well as reliability and easy maintenance. Two diesel engines Caterpillar with power 357 kW each which enables the yacht to run with speed 12 knots and close to transatlantic range of 2500 nautical miles. According to the customer's wish the yacht interior is made in two styles and sparkles for special luxury. Lower deck is decorated in classic style and on upper deck elements of Japanese décor are involved. Salon is finished in art deco and strikes with luxury textiles and decorative details. In master apartments there are two styling panels hand-made in marguetry technique. Ornamental picture is formed of shaped pieces of wood veneer of different colors and textures and also of pearl and bronze.

Audio-video system (AV) based on AMX with cordless control was integrated with LINN components and acoustics (Scotland), the company which is a supplier of English Royal Household and whose equipment is installed on the most mega yachts.

The yacht of project Timmerman 33 will be nominated in Yachts Trophies of the international magazine YACHTS in Cannes.

Company's stand № SYE026 will be accessible for visitors of the Show.

Timmerman Yachts for the first time will present transatlantic megayacht of Timmerman 47 at Monaco Yacht Show 2008. The first transatlantic mega yacht Timmerman 47 was developed by Vripack Yachting International, the largest European independent design company Bannenberg Designes Ltd., the company with world-wide reputation, was involved in interiors planning of Timmerman 47. The interior of the vessel was made by SINNEX, the Austrian company, which is the producer of individual interiors of super premium class for such yachts as Pelorus, The Maltese Falcon, Dilbar. The valuable wood species such as wenge, makassar, oak, American cherry, walnut root, ebony were used in rooms finishing.

Timmerman 47 was built under the supervision of Det Norske Veritas (DNV) and completely comply with MCA requirements. The yacht has classical layout with five guest and five crew cabins. The fore of the upper deck is occupied by the integrated Bridge, equipped with first-rate navigation equipment. Upper salon is a cozy room with a fireplace, where playing with your friends or reading a book, you may enjoy warm atmosphere of the cabin. Also it should be mentioned a sauna, as at the project Timmerman 33, which is one more uniqueness of the ocean beauty.

Also it should be mentioned about two diesel engines Caterpillar 3412E with power 537 kW each which enable yacht to run with speed 13 knots . At cruising speed the range is 4000 nautical miles. This will make possible not only to cross Atlantic without big problems but to make round the world trip with just five refuelings.

The yacht of project Timmerman 47 will be nominated in World Superyacht Awards 2008 of the international magazine Boatinternational.

Company's stand №QN9 will be accessible for visitors of the Show.
